

Name _____

Period ____

Lab Partner _____

Quantitative Observations

A. Data

Collect quantitative observations about ALL of the leaves. Be sure to include your observations about the leaf you are trying to locate so you can compare them to the rest of your data later. Don't forget to include the correct metric units!

Leaf Data

Leaf	Length (cm)	Length (mm)	Width (cm)	Width (mm)
Original				
A				
B				
C				
D				
E				
F				

B. Conclusions

Answer each of the questions below using complete sentences. Be specific and use detail in your explanations.

1. Which leaf (letter) did you discover was actually the missing golden leaf?
2. How can you prove that is the missing leaf? BE SPECIFIC!
3. What did you learn about measuring and making observations from this lab?
